DETAILED ACTION

This is an Allowance for application no. 09/892,160 in response to the amendment filed on March 3, 2005 where in claims 1-4, 6-24, 26-44 and 46-60 are presented for examination.

Allowable Subject Matter

After a further search and a thorough examination of the present application and in light of the Applicant's amendments and in light of the prior art made of record, claims 1-4, 6-24, 26-44 and 46-60 are found to be in condition for allowance.

The following is an examiner's statement of reasons for allowance:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a system, method, and computer program for establishing two-way video communication between a plurality of terminals connected by a network.

The closest prior art (Yonezawa et al. US Patent 6,741,276) discloses a similar system, method and computer program for establishing two-way video communication between a plurality of terminals connected by a network. However, Yonezawa fails to particularly teach or suggest " wherein the plurality of video streams are arranged in a ticker format; detecting a user selection of one of the video streams being displayed; and establishing two-way video communication between the first terminal and the terminal associated with the selected video stream." as claimed and described in the specification (Page 23 Lines 8-16, Fig. 9).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
